Professional Summary:

Aspiring AI Engineer with practical experience of 7 months in building machine learning and data-driven applications using Python and Django. Possesses strong intuition of core ML algorithms and deep learning architectures, with a focus on applying Generative AI and LLM tools to solve real-world problems.

Education

Sep2024–Present

University of Engineering and Technology, Lahore

Bachelor of Science in Computer Science

CGPA: 3.70/4.0

Relevant Coursework

- Artificial Intelligence
- Introduction to Data Science
- Data Structures and Algorithms
- Artificial Intelligence
- Software Engineering
- Multivariate Calculus
- Design and Analysis of Algorithm
- Database Systems
- Applied Probability and Statistics
- Software Project Management
- Linear Algebra

Selected Academic Projects

RAG LinkedIn Job Finder and Resume Builder Focusing on ATS

Python, LangChain, OpenAI Pinecone, pandas

- Developed an System that is capable of Web Scraping LinkedIn Jobs and then Making resume Tailored to That job and make version of it

Improved employment chances by 30 percent

AI Physiotherapy -Github

Python, Pandas, NumPy, Pytorch, MediaPipe, OpenCV, DSA,

- Build CNN along with Bi-directional LSTM to build pose detection system for elbow plank, trained on 24 GB dataset with over 14000 videos with Stack Ensemble using XGBOOST, Random Forest, Ada Boost with Logistic Regression as meta Learner

Handle Extreme Data Imbalance with 10 percent correct and 90 percent incorrect posture

Achieve F1 Score of 75 percent

AI Face Detection System -Github

Python, Pandas, NumPy, Pytorch, CNN, ArcFace, RetinaFace

- As CR, I address the problem of Proxies and in order to solve this problem I create Face detection System which take 32 frames of person face and tell that which person is present and mark other absent completely finishing the chance Proxy and make marking Attendance super easy, we have taken pre trained facebook Retina Face 50 model and freeze some layers and train on our class student images

Decrease Proxies in Classes by 40 percent

Suspicious Network Detection System with Deployment on EC2 (AWS) -Github

Python, Pandas, NumPy, scikit-learn, EC2, Docker, MLFLOW, ECR, S3, OOP FOCUSED —

- As increasing risk in Data Breaches, I trained an model on detecting suspicious network activities, make an robust ETL pipeline with deployment and CI / CD workflow and hosting it on EC2 instance, the model after hypertuning and preprocessing gives an accuracy of 92 percent

Decrease Proxies in Classes by 40 percent

Small Projects : Car Price Prediction (Real time Canadian Car Company web scraping), Student Portal with 20 CRUD tables integration of AI and Block Chain and multiple User Interface), PowerBI on Hospital base data and building SQL DB

Skills:

Technical Skills

Languages: Python , SQL

Data Visualization: Pandas, NumPy, Matplotlib, Seaborn

Machine Learning: Scikit-learn, PyTorch

Gen-AI: OpenAI, Hugging Face, LangChain ,PEFT

MLOPS Tools: Git, GitHub, Docker , Amazon Web Services ,MLFLOW

Soft Skills

Leadership, Communication, Problem-Solving, Organizational Skills, Teamwork, Attention to Detail, Time Management

Leadership and Extracurricular

Lead of Event Management in Data Science Department	Sep2025-Present
Class Representative of Senior Batch Of Data Science	Oct2024-Present
Host Orientation in 2024 and 2025 Batches in Data Science as Lead	2024 AND 2025

Awards and Achievements

Hohnaar Scholarship Holder Government of Pakistan	2024-Present
Conduct Seminar on Machine Learning to 500+ Students	Dec2025
Conduct an Event as Sr.Lead of 700 + Students on occasion of Welcome Party with Chief Guest as Vice Chancellor of UET	Sep2024-Nov2024

Certifications and Courses

Complete Data Science,Machine Learning,DL,NLP Bootcamp — [View Certificate 1](#)
Offered By: KrishNaik & Coursera

Generative AI with Large Language Models — [View Certificate 2](#)
Offered By: DeepLearningAI and Corsera

Langchain Course
Offered by CampusX (Youtube)

MLOPS Course
Offered by Vikash Das (Youtube)
